

2.3 Solution Requirements

1. Functional Requirements (FR)

Requirement ID	Module Scope	Description	Technical Implementation
FR-01	Leave Request	System must prevent students from selecting an End Date earlier than the Start Date.	Client Script (onChange) on x_scms_leave_request
FR-02	Leave Approval	Leave requests must automatically route to the student's Department Head (HOD) for digital signature.	Flow Designer Trigger on x_scms_leave_request insert
FR-03	Course Registration	System must enforce a rule preventing duplicate course enrollments for the same student.	Server-side Business Rule / Script Include check on x_scms_enrollment
FR-04	Maintenance Tickets	Complaints must auto-assign to the appropriate Helpdesk assignment group based on category.	Auto-assignment Rules on x_scms_complaint

FR-05	Notifications	System must send instant email updates to students upon approval or rejection of their applications.	Notification engine triggered by Flow Designer
-------	---------------	--	--

2. Non-Functional Requirements (NFR)

- **NFR-01 (Security & Access):** System must restrict access using ServiceNow Access Control Lists (ACLs). Students must only view self-owned records; Faculty can view department-scoped records; System Admins retain full access.
- **NFR-02 (Performance):** Portal page load time must render within 2 seconds for all catalog form requests.
- **NFR-03 (Auditability):** Every approval decision and state change must generate an immutable audit log entry in the record activity history.
